

The Swiss Info Portal for Cybersecurity

«Hackers, ransomware, cryptominer, DDoS attacks, phishing, skimming, social engineering, APTs and co. – there is no end to the flood of cyber threats. In 2022 cybercriminals were estimated to be releasing two new malware programs per second!

The scary thing is that in the past, you could build high walls around yourself and hide behind them. Today, you have to assume that cyber threats have already overcome firewalls and the like and have penetrated your own network.

The time of perimeter defence seems to be at an end. But how do you protect yourself from modern cyber threats when you can no longer rely on walls? «What helps against social engineering?», «How do encryption solutions work?» and «What is crapware anyway?».

You can find out on [SwissCybersecurity.net](https://www.swisscybersecurity.net), the information portal for cybersecurity in Switzerland.

Here you can read news, background information, current warnings about cybersecurity, cybercrime, strategies for defending against ransomware, DDoS attacks and more!

Target group

CISOs and CSOs as well as IT security managers of Swiss companies, C-levels at user companies or their ICT managers, all providers and implementation partners of hardware, software, services, networks and consulting services who care about IT security, cybersecurity enthusiasts who want to be up to date on cyber threats and defence strategies, all ICT investment managers in Swiss companies with more than 50 employees, system integrators, value-added resellers, value-added distributors, BPO and BPM providers, ICT consulting enterprises
