Referendum of
28 September 2025:
Introduction of the e-ID

FOCUS TOPIC IT FOR GOV 2026:

E-ID – WHAT TO DO NOW

After the electorate approves the e-ID Act on 28 September 2025, the digitalisation of public administration will gain further momentum. The rollout of the government-issued digital identity is planned to begin in the summer of 2026. Until then, the federal government, cantons and municipalities must prepare for an increasing demand from the public for efficient, e-ID-based administrative services.

POSITIONING

The «Netzwoche» thematic publication «IT for Gov» examines issues surrounding digitalisation and ICT procurement in the public sector (federal, cantonal and municipal levels) from the perspective of administrations and organisations, and builds a bridge between clients and suppliers. In addition, «IT for Gov» delves further into the focus topic «E-ID – what administrations must do now», the key milestone in the digitalisation of public administration. With contributions from authors, the publication also addresses other current trends, gives prominent representatives a platform to speak, and reports on successfully completed projects.

TARGET GROUP

- Decision makers and preparers in public administration
- ICT suppliers
- Swiss authorities
- Employees of the Federal Government and administrations
- Cantonal representatives
- Municipal representatives
